Section I. General topics

Prehistory of the X-conference series: an international conference in Debrecen 25 years ago
H. Genz 1
Trends in atomic inner-shell physics
T. Åberg 5
Interpretation of scattering by charged particles and photons
J.H. McGuire and J.C. Straton 17
Multielectron transitions in X-ray absorption and inner-shell ionization phenomena
T. Mukoyama and Y. Ito 26
Atomic physics experiments at ion storage rings
A. Müller 34

Section II. Processes involving multi-charged ions

Recent questions about the excitation mechanism at intermediate velocity
L. Adoui, M. Chabot, A. Chetioui, I. Despiney, L. Guiraud, A. L'Hoir, M.F. Politis, J.P. Rozet, D. Schmaus, C. Stephan, A. Touati, D. Vernhet, K. Wohrer, A. Cassimi, J.P. Grandin, J.M. Ramillon, A. Macias, F. Martin, A. Riera, J.L. Sanz and R. Gayet 45
Spectroscopic studies of metastable ion–atom collisions: an overview of doubly excited systems
S. Bliman and M. Cornille 51
Charge-changing and excitation in high energy, multicharged ion collisions
W.G. Graham 58
X-ray emission from very-heavy H- and He-like ions in collisions with gaseous and solid targets
Th. Stöhlker, P.H. Mokler, K. Beckert, F. Bosch, H. Eickhoff, B. Franzke, H. Geissel, M. Jung, T. Kandler, O. Klepper, C. Kozhuharov, R. Moshammer, F. Nickel, F. Nolden, H. Reich, P. Rymuza, C. Scheidenberger, P. Spädtke, Z. Stachura, M. Steck and A. Warczak 64
Single and double ionization of helium for fast, highly-charged ion-impact
J. Ullrich, R. Dörner, H. Berg, C.L. Cocke, J. Euler, K. Froschauer, S. Hagmann, O. Jagutzki, S. Lencinas, R. Mann, V. Mergel, R. Moshammer, H. Schmidt-Böcking, H. Tawara and M. Unverzagt 70

Section III. X-ray absorption, emission and scattering; X-ray sources, optics, microscopy

New sources, newer detectors, old methods – the future of protein crystallography at synchrotrons
I.J. Clifton, S. Wakatsuki and J. Hajdu 76
Intense and monochromatic X-rays by channeling radiation
H. Genz 82
High-resolution X-ray emission spectra of transition-metal compounds
J. Kawai 88
New results in soft X-ray microscopy
J. Kirz, H. Ade, E. Anderson, C. Buckley, H. Chapman, M. Howells, C. Jacobsen, C.-H. Ko, S. Lindaas, D. Sayre, S. Williams, S. Wirick and X. Zhang 92

0168-583X/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

Feasibility study of a channeling radiation source for applications in the X-ray region
W. Knüpfer 98
Status of soft X-ray photoemission microscopy utilizing synchrotron radiation
A.K. Ray-Chaudhuri and F. Cerrina 104
High energy synchrotron radiation sources
H. Winick 112

Section IV. Interactions with solids, surfaces and clusters; channeling

Electronic capture and excitation of highly charged channeled ions
S. Andriamonje, B. Blank, R. Del Moral, J.P. Dufour, L. Faux, A. Fleury, M.S. Pravikoff, C. Röhl, M. Chevallier, D. Dauvergne, R. Kirsch, J.C. Poizat, J. Remillieux, C. Cohen, Y. Girard, A. L'Hoir, J.P. Rozet, D. Schmaus, D. Vernhet, J. Dural, H. Rothard, M. Toulemonde, Y. Quéré and N. Cue 116
Progress in X-ray and electron-optical investigations of structural changes by fast heavy ions in semiconductors
J. Auleytner 124
Slow electrons produced by slow multicharged ions on a clean metal surface
F. Aumayr, H. Kurz and HP. Winter 130
On the mechanism of formation of hollow atoms below a surface
J.P. Briand, B. d'Etat, D. Schneider, M. Clark and V. Decaux 138
Magnetic X-ray dichroism in the soft X-ray energy range: application to the study of magnetism in intermetallic and modulated (multilayers, superlattices) systems
G. Krill, J.P. Schillé, M. Finazzi, P.S.C. Brouder and J.P. Kappler 142
Interaction of swift heavy particles with solids: electron emission
H. Rothard 149
Observation of defects on insulator surfaces following bombardment with slow Kr^{35+}, Xe^{44+}, Th^{74+}, and U^{70+} ions
D. Schneider, M.A. Briere, J. McDonald and W. Siekhaus 156
Theoretical investigations of relaxation and screening in X-ray absorption and photoionization of C_{60} and La, Ba–C_{60}
B. Wästberg and G. Wendin 162

Section V. Photoionization, photoelectron and Auger electron spectroscopy

Single and double ionization of helium by high-energy photon impact
L.R. Andersson and J. Burgdörfer 167
High-resolution photoionization of core-excited atoms and molecules using synchrotron radiation
M. Domke, G. Remmers and G. Kaindl 173
Electron spectrometry of open-shell atoms
M.O. Krause 178
Vibrational and ligand-field effects in the high resolution core-level spectroscopy of molecules
D.G.J. Sutherland, Z.F. Liu, G.M. Bancroft and K.H. Tan 183
Present status of inner-shell photoionization studies in singly- and multiply-charged atomic ions
F.J. Wuilleumier, J.-M. Bizau, D. Cubaynes, B. Rouvellou and L. Journel 190

Section VI. Inner-hole decay; coherence, polarization and angular correlation

Screened QED effects in many-electron ions
S.A. Blundell 198
The observation of coherence between atomic states of widely different energies
H.G.M. Heideman, J.A. de Gouw and J. van Eck 204

Variation of the C (KVV) Auger angular distribution in the C (1s) σ*-resonance of CO
O. Hemmers, F. Heiser, J. Eiben, R. Wehlitz and U. Becker 209
X-ray and Auger de-excitation processes in resonantly-excited and core-ionized molecules
F.P. Larkins 215
High precision calculations of inner shell transitions in heavy elements
E. Lindroth and P. Indelicato 222
Alignment after inner-shell ionization by electron impact near and at threshold
W. Mehlhorn 227
QED effects in high-Z few-electron atoms
P.J. Mohr 232
Electronic states in the presence of the inner-shell hole studied by the method of DV-Xα
Y. Ohmura, T. Ikeda, H. Nakamatsu and T. Mukoyama 237
Angular distribution of Auger electrons following photoionization
V. Schmidt 241
Resonance and threshold effects in polarized X-ray emission from atoms and molecules
S.H. Southworth 247
Correlation in inner shell ionisation studied by coincidence experiments
G. Stefani, L. Avaldi and R. Camilloni 253
Applications of Auger photoelectron coincidence spectroscopy (APECS) to understanding inner-shell transitions
S.M. Thurgate, C.P. Lund and A.B. Wedding 259

Section VII. Special inner-shell processes; exotic atoms

Characteristic and non-characteristic X-ray emission by lepton impact
R. Hippler and H. Schneider 267
The physics and chemistry of exotic atoms
D. Horváth 273
Toxicity and therapeutic effects of low-energy electrons
A.I. Kassis 279
Present status of the experimental L-shell ionization cross sections for light ion impact
I. Orlic 285
Exotic atoms and their electron shell
L.M. Simons, D. Abbot, B. Bach, R. Bacher, A. Badertscher, P. Blüm, P. DeCecco, J. Eades, J. Egger, K. Elsener, D. Gotta, P. Hauser, K. Heitlinger, D. Horváth, F. Kottmann, E. Morenzoni, J. Missimer, J.J. Reidy, R. Siegel, D. Taqqu and D. Viel 293

Concluding remarks of X-93
A. Bordenave-Montesquieu 301
